

UKGEOforum

UK GEOforum is pleased to announce its forthcoming

UKGEOforum 2007 Lecture

featuring guest speaker

Dr David Williams

Director General of the British National Space Centre

Title: The Role of Space in Geospatial Data

This lecture will cover the contribution that space technologies such as earth observation and global positioning satellites play in the development of geospatial data sets and practical applications on the ground, with particular reference to current programmes such as Galileo and GMES (Global Monitoring for Environment and Security).

Thursday 25th January 2007, 18.00 - 19.00

Royal Institution of Chartered Surveyors

12 Great George Street • Parliament Square • London • SW1P 3AD

This lecture is free of charge and open to all. Non members are welcome.

The RICS bar will be open after the lecture.
